

B2C dry-star uv

WHY DOES HEARING SYSTEMS NEED TO BE DRIED?

Moisture and ear wax can impair the function of hearing systems and cause failures.

*The **dry-star uv** dries your hearing systems with comfort at 55°C warm air by convective flow. Daily usage reduces failures, repair costs and extends the life time of your hearing systems significantly.*

*The **comfort drying** will get you the pleasure of hearing and is value-preserving.*

Perfect drying by
convective flow

WHY ANOTHER HYGIENIC CLEANSING?

Germs, bacteria and fungi occur almost anywhere. Ear molds or hearing systems within the ear poses particular risks for an ear infection.

*In addition to drying **UV-C** light (253,7 nm) provides clinical cleanliness. 99,9% of bacteria and viruses will be eliminated.*

This clinical cleanliness protects both your hearing systems as well as your health.
